EXPERIENCE

Daneshjooyar — Front-End Developer
Oct 2024 – Present | Birjand, Iran (Hybrid)

- Contributed to the development of production websites for three organizations, including Birjand Science and Technology Park, Ali Akbar Rehabilitation Center, and Ahmadi Auto Parts.
- Translated Figma designs into responsive, functional web pages using HTML, CSS, Bootstrap, and JavaScript.
- Collaborated with team members using Git and GitHub for version control and coordinated development.
- Supported learners as a Teaching Assistant and Front-End Instructor, sharing practical web development knowledge.

Projects:

Birjand Science and Technology Park

Responsibilities:

- Developed the website's front-end and user interface using HTML, CSS, Bootstrap, and JavaScript.
- Implemented responsive web pages based on UI designs.

Achievements:

- Delivered a consistent user interface and improved page rendering across different screen sizes.

Hazrat Ali Akbar Rehabilitation Center

Responsibilities:

- Developed the website's front-end and user interface using HTML, CSS, Bootstrap, and JavaScript.
- Implemented and refined page layouts to present rehabilitation services effectively.

Achievements:

- Created an organized interface for presenting the center's information and services.

Ahmadi Auto Parts

Responsibilities:

- Developed the website's front-end and user interface using HTML, CSS, Bootstrap, and JavaScript.
- Implemented user interface pages and sections to present product and service information clearly.

Achievements:

- Improved the visual structure of web pages and delivered a more consistent user experience.

CERTIFICATIONS

Angular — SoloLearn (Credential, 2026)
